Professional Summary

Computer Science and Engineering undergraduate with interest in Java Development, Blockchain Development, Data Structures & Algorithms, and Web Development. Skilled in developing responsive applications and strengthening problem-solving through practical coding and continuous learning.

Education

Bachelor of Technology (B.Tech) in Computer Science and Engineering GL Bajaj Group of Institutions, Mathura Expected Graduation: 2028

Technical Skills

- Programming Language: Java
- Core Skills: Data Structures and Algorithms
- Development Domains: Blockchain Development, Java Development, Web Development
- Web Technologies: HTML, CSS, JavaScript
- Computer Fundamentals: OOPS, Operating Systems (OS), Database Management System (DBMS), Computer Networks (CN)
- Developer Tools: Git, GitHub

Projects

Web Development Projects

- Developed responsive web applications using HTML, CSS, and JavaScript
- Built interactive and user-friendly interfaces.

Data Structures and Algorithms

- Practicing DSA using Java and improving coding efficiency.

Achievements & Activities

- Regular problem-solving practice
- Continuous learning of modern development technologies.

Interests

Java Development, Blockchain Development, Web Development, Software Engineering
